

RoyAlloy™ STAINLESS

Tech Mold of Tempe, Arizona has developed a long-standing reputation for supplying fine high cavitation molds to the plastics industry.

According to Tech Mold's President, Bill Kushmaul, their endless pursuit to provide the highest quality, has been enhanced by the use of RoyAlloy™ stainless steel for all mold bases during the last five years.

RoyAlloy™ plates provide Tech Mold with many improved features and benefits compared to traditional 420F stainless holder steels.

These features include improved dimensional stability and mechanical properties; better uniformity and consistency and superior surface finishes.

RoyAlloy™ Stainless Holder Steel for improved plastics mold tooling.
